

FIREFLY INTERNATIONAL HAND BORER

**25 Thrift Close
MOUNT THORLEY
NSW 2330
P. (02) 6574 6500
F. (02) 6574 6569**

**Can be
Mounted
to an
Airleg**

SPECIFICATIONS:-

Weight.....	8.5 kg
Operating Air Pressur.....	580 kPa
Air Consumption.....	3.1 m3/min
Stall Torque.....	82 Nm
Chuck Speed.....	1200 RPM
Air Inlet Dia	1/2" NPT
Water Inlet Dia.....	3/8" NPT

The Firefly Handborer has been designed and manufactured as an extremely strong but lightweight portable handheld drilling machine

Robust Construction = Reliability-Serviceability

FEATURES

- Manufactured from fully machined Nylon with removable cylinder liner.
- The lightweight construction makes it a portable machine that minimises operator fatigue and strain related injuries.
- Robust construction allows consistent operation under extreme conditions.
- Through-the-shaft water supply gives positive pressure at the chuck and does not allow water to escape into the motor and gearbox.
- The rotateable exhaust system allows the exhausted air to be directed to suit the operators requirements.
- Inbuilt clutch arrangement allows for improved bolt tensioning
