

# Stone Dusting

## Hydraulic Stone Duster

Connects Directly to QDS

- This machine has two hydraulic motors—one runs the blower and the other runs the rolling vane
- Will dust up to 122 metres through 50mm hose
- Comes complete with 2.4 metres of hydraulic hose for connection to hydraulic power source
- Operates on hydraulic from 37.9 to 75.8 LPM, 105 to 137 Bar
- A filter is fitted to the inlet of the blower to reduce noise and eliminate foreign materials entering the blower chamber
- The bag breaker in the hopper allows bag of dust to be opened quickly without the use of knives or tools

### Specifications:-

Length	1.14 metres
Width	0.7 metres
Height	0.53 metres
Weight	72kgs
Hopper Capacity	55kgs
Output	variable
