

FIREFLY INTERNATIONAL

MK5 3 STAGE, GEARED MOTOR ROOFBOLTER

PRODUCT CODE: FF-MK5C

Designed with Safety, Strength, Durability and Serviceability in mind, this geared model design has power and other cost efficient features:

FEATURES

- Outer leg protective cover.
- 3 stage leg assembly.
- Locking square drive.
- Clutch bearing.
- Water and air strainers.
- High torque motor.
- Larger leg giving additional thrust, suitable for fully encapsulated bolting and installing flexi-bolts.
- The provision of a handrail/ motorguard and leg handle make it easily carried by a single operator.
- The air intake is fitted with an in-line filter, providing an adequate supply of clean air to the motor at all times.

- The fitting of a water filter has been incorporated in the design to ensure only clean water enters the machine. A constant and clean water flow assists in the cooling of the machine, greater reliability, and with improved flushing to provide clean drilling.
